

maxxOne KITE WIRELESS CONTACT SENSOR

LAN ♦ WIFI ♦ CELLULAR

FEATURES

The wireless contact sensor is an accessory of Kite smart alarm system. It's fashionably designed, energy saving, and low battery warning supported. The system would inform users to replace the battery by App when needed.

It's easy to setup and works well with most doors and windows. When the transmitter and magnet are apart, the sensor triggers the alarm. Transmitter can be put on either of magnet's left or right side.

Note: Requires Kite Main Panel to function. May not be compatible with alternate alarm systems.
